

Themack Architects

We are an RIBA Chartered Practice and our Architects are ARB registered. We specialise in new builds, high quality extensions, refurbishments and alterations to country houses, barn conversions, timber-framed constructions and commercial properties.

We have no stylistic preconceptions, we pride ourselves in providing good planning and craftsmanship in style appropriate to context and to the Client's desired building style, is more important than imposing a single style philosophy. A careful analysis of the site and Client's brief is undertaken to make sure that the best option is taken.

We offer a personal service looking after building projects from inception to completion. Green issues and sustainability help form our thinking on design.

We also provide an in-house interior design service as part of an overall build project or as a stand-alone service for complete redesign, individual rooms or single items such as bespoke furniture. Our aim is to give our clients a creative, well-designed, workable and unique space in which to live and work.

We have built up a good working relationship with local planning authorities, which enables us to achieve a 95% success rate in achieving approval for proposed works.
